

Arnaud Grousset

Senior Backend Engineer · PHP/Symfony — Financial flows & blockchain · Legacy modernization · Automation

18 years of experience · Fully remote (CET) · Freelance or full-time

eleyone@gmail.com · linkedin.com/in/groussetarnaud

Senior Back-End Engineer with 18 years of experience in PHP/Symfony, financial flows, legacy modernization, and distributed systems. Most recently spent 4 years at Chiliz (blockchain/fintech) designing on-chain financial flows; previously modernized high-traffic applications for Orange and April, and built e-commerce (Mister Auto) and CRM (Synolia) platforms. My specialty: systems with real technical stakes — and code that lasts.

Core skills

- **Backend:** PHP 8, Symfony, REST APIs & API integration, system design, DDD (in production), microservices, event-driven & distributed architectures, Zend Framework (legacy)
- **Databases & caching:** PostgreSQL, MySQL, Redis
- **Messaging & cloud:** RabbitMQ, AWS SQS/SNS
- **Blockchain:** Ethereum, Chiliz Chain, Solana (early work), viem.js, ethers.js, Web3.js
- **DevOps & quality:** Docker, CI/CD (GitHub Actions, GitLab CI), automated testing
- **Also:** TypeScript/Node.js, Symfony UX/Stimulus, n8n · **AI tooling:** Claude Code (daily), Cursor

Experience

Chiliz — Senior Backend Developer

July 2022 – April 2026 · Fully remote, international team · Blockchain/fintech (Ethereum, Chiliz Chain)

Designed and implemented on-chain financial flows for the Chiliz ecosystem (Socios.com, fan tokens), within a domain-driven microservices architecture — mainly on the wallet service, plus the NFT and user services.

- Designed an **on-chain batch processing architecture** grouping multiple operations across different wallets into a single chained workflow, improving traceability, reconciliation, and failure handling
- **Designed service decompositions** to narrow service scopes and keep domain boundaries clean (e.g., reducing the wallet service's scope)
- Active contributor to the **migration of Chiliz-issued tokens** from an Ethereum fork to Chiliz Chain
- **Migrated custodial wallets to non-custodial**, integrating the DFNS provider
- Designed and built **an internal trading application from scratch** (Symfony / Symfony UX) centralizing operations across multiple DEXs — deposits, withdrawals, swaps — for internal traders and market makers, then extended it multi-chain (early Solana integration work)
- Worked on the **internal indexer** (TypeScript, viem.js): collecting on-chain transactions for verification and reconciliation, and computing **trading decision-support KPIs** (buy, sell, pool liquidation)

Environment: PHP 8, Symfony, Symfony UX, PostgreSQL, RabbitMQ, AWS SQS/SNS, Redis, Docker, TypeScript, viem.js, ethers.js, Ethereum, Chiliz Chain, Solana, GitHub Actions, DDD

Synolia — Lead Developer

January 2020 – June 2022 · Lyon, France · CRM integrator

Design and development of custom solutions around SugarCRM for multiple clients.

- For Qérys: built **complete custom plugins turning SugarCRM into a retail quoting tool**, a use case it was never designed for
- Technical referent for the team: solution design, code reviews, developer support

Environment: PHP, SugarCRM, MySQL, JavaScript, Docker, GitLab CI

Mister Auto (PSA Group) — Technical Architect / Project Lead

January 2018 – January 2020 · Villeurbanne, France · Automotive parts e-commerce — via Modis

- Led a team of 6 developers, coordinating delivery priorities and code quality
- Owned technical solution choices and wrote the technical specifications for the platform

Environment: PHP, MySQL, high-volume e-commerce architecture

April Technologies — PHP Expert

January 2017 – December 2017 · Lyon, France · Insurance — via Modis

- Developed new features on an insurance management application

Environment: PHP, Zend Framework, MySQL

Orange — PHP / Zend Framework Expert

July 2014 – December 2016 · Lyon, France · Via Modis

- **Rewrote 90% of a large legacy Zend Framework 1 application**, improving performance and maintainability, delivered **with zero production downtime**
- Designed and built a ZF2 / BackboneJS / Marionette application

Environment: PHP, Zend Framework 1 & 2, BackboneJS, MySQL

Earlier career — PHP / Zend Framework Consultant

July 2008 – June 2014 · Paris & Lyon, France

- **FHM Solutions** (2011-2014): PHP/Zend expert missions at CGI (insurance application, April group), BETC Digital (ZF refactoring and best practices, first junior lead experience), 1001 Listes – Galeries Lafayette (IS merger), Primavista (merger of 2 websites)
- **Avenue Web Système** (2008-2011): design and development of applications for local governments (PHP/Zend Framework), maintenance of Java applets

On the side — Ton Pote Le Geek (freelance)

Automation systems and custom tools for entrepreneurs and small businesses: connecting their tools, removing manual work, shipping client-facing apps (most recently, a profitability calculator for a training business). *Stack: n8n, Symfony, APIs, self-hosted infrastructure.*

Education & languages

- **DUT in Computer Science** — IUT2 Grenoble, France (2008)
- **Certifications:** Zend Certified Engineer
- **Languages:** French (native), English (full professional)
